

CHILLERS

ICE BUILDER MODEL CKIB

CapKold Chilled Water Production System to provide cold water for the rapid chilling of packaged product in: Tumble Chillers, Cook Tanks, Direct Steam Kettles.

CONSTRUCTION:

System to consist of the following items:

- Model GT ____ ice builder of ____ lbs capacity
- Model ____, ____ refrigeration (air or water) cooled
- Ice thickness control panel
- Optional ____ HP chilled water circulation pump
- Optional remote, system on off panel

APPLICATIONS: A reliable and cost effective source of chilled water is key to the rapid chilling of kettle cooked and Cook Tank prepared foods and also a valuable resource in other food prep and production applications. The sizing of the Ice Building Tank and supporting Refrigeration System is a function of the estimated daily chilled water requirements for all applications. Typical Production Equipment Chilled Potential growth, future equipment additions, added production shifts and physical layout and relationship of Ice Building Tank to production areas will all impact proper sizing of Ice Builders.

COMPONENTS:

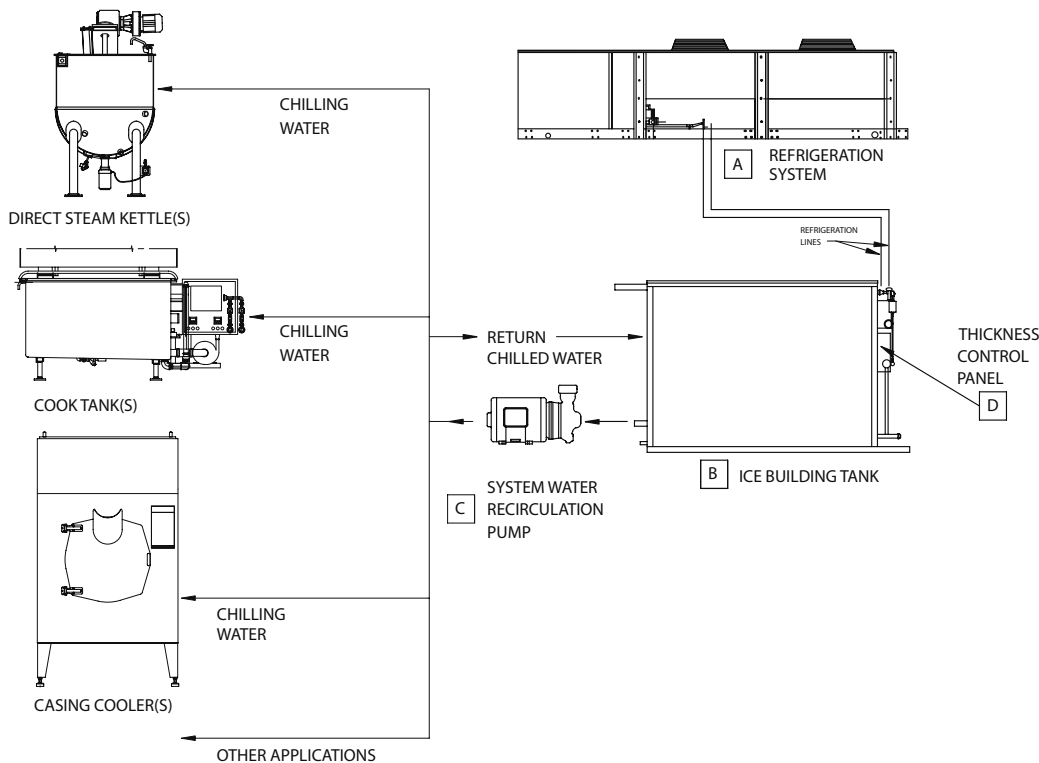

- (A) Air Cooled Refrigeration System
- (C) System Water Circulation Pump
- (B) Ice Building Tank
- (D) Ice Water Thickness Control Panel

ADDITIONAL RESOURCES:

[Request A Quote](#)[Sales Tools](#)[Find A Rep](#)

(A) ICE BUILDER REFRIGERATION:

Provides the chilling capacity for the Ice Building Tank and features:

- A sealed Compressor, designed for efficient operation with R404A or Ammonia (Please Specify)
- Liquid line dryer and suction line accumulator
- Fixed suction line core type filter
- Suction & Discharge line vibration eliminators
- Integrated controls include:
 - Head pressure controls
 - Liquid line solenoid valve and switch
- Available Options:
 - Oil separator
 - Full size receiver
 - Alternative refrigerants
 - Oil failure switch
 - Head pressure control
 - Suction accumulator with heat exchanger
 - Air or Water cooled condenser (Consult CapKold)
 - Crank case heater
- Sight glass
- Fan cycling system if required

(B) ICE BUILDING TANK MODEL:

Used to build ice around a series of refrigeration coils and features: (see next page for drawings and charts)

- Tank fabricated from 3/16" stainless steel
- 2" foam insulation with 18 gauge stainless steel outer skin
- Insulated stainless steel covers
- Designed for indoor or outdoor installation
- Heavy duty coils, schedule 40, stainless steel with structural supports
- Automatic water fill
- Ice thickness control to regulate ice buildup around coils (See Ice Thickness Control Panel)
- Standard units ship in one piece.
- Available Options:
 - Remote start stop station
 - On and Off timer
 - Remote pump control panel with disconnect

(B) ICE BUILDING TANK MODEL: Continued

Ice Builder System Component Ordering Guide: (Contact CapKold for assistance or review of Ice Builder Sizing)

NOTE: LARGER SIZES AVAILABLE – PLEASE CALL THE FACTORY FOR INFORMATION							

(C) SYSTEM WATER CIRCULATION PUMP:

To pump chilled water from Ice Building Tank to remote CapKold Tumble Chillers, Cook Tanks and Kettle jackets and back to Ice Builder.

_ Horsepower either cast iron or stainless steel construction.

(D) ICE THICKNESS CONTROL PANEL:

Regulates ice production in the Ice Building Tank. Control Panel to consist of the following features:

- Stainless steel wall-mounted housing which is usually installed in the control panel of the ice building unit. It is easily changed but selecting the amount of ice required. You can also turn it off during periodic shutdown and save on utility costs.
- Standard controls include:
 - Ice pilot light
 - Ice inventory system, thickness adjustable

Ice Water Thickness Control Panel
